

TECHNICAL PROJECTS

SPACE-HOPPER | [Github Link](#) | [Website](#)

React, Redux, Express, Sequelize, Postgres, HTML, CSS

An e-commerce website to browse and purchase frog-themed home decor.

- Built front end to incorporate user login, guest browsing and a cart to store items until checkout
- Integrated database and API to populate store items and allow cart items to persist in the database

RIDES | [GithubLink](#) | [Website](#)

React, React Hooks, Gatsby, Tone.js, D3, Leaflet, CSS

A web app where the user "rides" through a geo-spatial map of the train system with an interactive soundscape for selected stations.

- Built a map with Leaflet and geoJSON data to display the MTA train system and associated stations.
- Brought synthesized sounds made in Tone.js into React components
- Created an animation with D3 to give the appearance of a train riding along a subway line
